

Changing the World

Mighty oaks from tiny acorns grow.

Many of you have known me for years. For others this is brand new. I am on a mission. This mission is not mine, but rather, God's mission through me. For those of you who know me, I have had my share of successes in life. I was a drafted hockey player, won the world championships in my sport of racquetball, graduate with my BSc. Cum Laude from Concordia University and with my Doctor of Veterinary Medicine degree from Ontario Veterinary College. I also had successes in business, owning two sports bar/restos and taking a nutritional company I started onto NASDAQ 11 short months from inception of the company to name but a few.

What I am doing now is altogether different. I say this because in the last almost 20 years I have come to know God in a great way. I see His Guiding Hand in everything I do. It is He who leads me to people and people to me. You are such people!

I have attached a one page overview of G3 to give you an idea of all the areas of this initiative. Actually, there is no area of human (and animal) life that this does not include! This must be the case as the end objective is that we bring heaven to earth for every single person (and animal) on the planet!

Here is a link to a document I have created to outline the dreams God has put on my heart, along with some timelines. <http://rossg3.ca/my-dreams.php>. Please read through this document carefully and go to all the provided links.

The first stage of this project is set for completion by July 1, 2025. This includes G3 Global Corporate Headquarters, the flagship NuVoWay LifeStyle Centre and G3 Golf 36 Hole Championship Layout - Braeside National, all in Senneville, QC.

Between 2025 and 2030 we will aggressively develop locations across the world on a big scale! These will be on big lots (>600acres) located just outside city limits and featuring NuVoWay LifeStyle Centres, G3 Golf 36 Hole Championship Layouts, a Hotel/Hotels, an Amusement Park, The Forum Entertainment and Restaurant Complexes as well as a 5,000 seat Performance Hall. The goal for 2030 is to have at least 250 such complexes across North America and the world.

The objective for 2050 is to have 10,000 of these complexes down to every city across the world in order that every person on the planet has access to all of this.

As the program takes hold, your names and talents will progressively be known to more and more people. By 2030, when we have greater than 250 locations across the world, there will be the same number of 5,000 seat Performance Halls. You will sell out all of these Halls and will have the choice of where you want to play!

Thank you for following your heart! There is much more to come, but, I'll stop here!

God bless you,

A handwritten signature in blue ink, appearing to read 'Ross', with a long horizontal line extending from the end of the signature.
