

Important Elements of The NDG 2030 Plan

Basic Income, Work Stimulus, NuVo

The **Basic Income Pilot Project** for NDG involves giving every community member 18 and over \$2,000 every 4 weeks or \$26,000/year. Our objective is to - in one fell swoop - lift everyone above the poverty line - and to provide them with the means to afford a decent dwelling, sufficient food and the basic necessities of life.

The **Work Stimulus Program** is a hand-in-hand accompaniment to the BIPP. It envisions again awarding people a living wage - \$25/hr for 20 hours/week - or \$2,000 every 4 weeks or \$26,000/year. The number of job offerings is limited only by our imagination.

The **NuVo Program** involves 100 NuVoWay LifeStyle Coaches all across the community - paid at a rate of \$60,000/year. At just over 67,000 residents in NDG, this means each NWLSC will have approximately 600 people to process and manage. They will in turn develop a **NuVo Network** across the entire community - ensuring that every community member is included. Each residential block will have a Block Captain.

Please see my [YouTube video](#).

How it will work.

The **NuVoWay LifeStyle Coaches** are central to facilitating this. They will take a huge burden off the existing social system, by relieving much of the burden of social workers and getting their people in shape - reducing family doctor, CLSC and hospital visits.

Through the **Work Stimulus Program** - workers will be distributed across the community in a myriad of positions - availing free and low cost services to the residents of NDG. This will enable people to fix up their homes (service people, artists, interior design people...), have home-cooked meals (personal cooks), look and feel their best (hair stylists, estheticians, NWLSC's...) etc...

Through [BuyNothing NDG](#) community members will exchange goods and services for free - further enhancing quality of life at lower earnings.
