

Hi David!

I am really happy to hear that you have got an appointment with a doctor who you like and have confidence in. I am praying that you will have the best outcome possible...

Things have been going great on my end.

- I have surrendered the entire body of work I had been working on (and perfecting!) for more than 20 years. I have put it in God's most capable hands, for realization along a timeline which He sees fit.
- I am now working on two initiatives which are separate and distinct yet interconnected:
  - [NDG Project](#) - my objective with this is to transform NDG into the best community in the world (heaven (on earth)). My summary for this is that I am 'redesigning society for ideal outcomes in every area of human and animal life.' You can see the plan here: [NDG Project Plan](#). While my mission is to transform NDG, there is a much bigger view - creating a duplicable model which may be implemented in any community across the world. My vision is to duplicate our successes until every square mile of this earth is heaven!
  - [The NuVoWay](#) - my goal with this is to help every person across the earth to become the best version of themselves. This includes development at the community level of [NuVoWay Community Centres](#) where we can implement several areas of the program. My hand was forced as far as this is concerned, by the zero response rate I received from numerous attempts to involve the local churches! In effect, I am developing a new movement which is completely founded on Love and where there will be no barriers to participation - it will be open to everyone.
  -

While I have developed these to be successful in a Capitalistic Market, my heart is telling me that somehow, someday I must find a way to make this free for everyone, always. After all, if my mission (God's mission through me) is to develop Heaven (on earth), it must be available to all people, free of charge always. To this end I am working with two entities who have very interesting programs:

- [BuyNothing Project](#) - this is a Gift Economy whereby people exchange products and services with no expectation of any return. The thing which really excites me about this is that it is already in 128,000 communities across the world! If we can be successful in building and developing this across NDG, the creators of the project may help us in taking our initiative to a vast array of communities across the world.
- [Moneyless Society](#) - this is my desired end point for our world. A society where there is no form of currency and where every person has equal access to everything within the community/world. The ramifications are tremendous! I have just begun conversations with Matt Holten, the creator on how we can move towards this in a community of 67,000 people. This is the kind of thing where my faith in/knowledge of God is paramount. I/we really do need his help here - in order to take the world away from the greedy/controlling minority and to deliver it to the masses!
- 

Well, David, that gives you a summary of what I am/have been up to! I am absolutely loving what I do every day and never cease to be amazed by the way God works in my life!

I look forward to seeing you over breakfast at NDG Luncheonette when things quiet down for you...

All my best,

rJ
