

Informing you on the wide and varied activities of G3

# Come Away With Me

By Ross Harvey, [rossG3@gmail.com](mailto:rossG3@gmail.com)

It is almost a full 12 months since I created the first E-Zine. I can't believe so much time has flown past! And so many things have been started - and even terminated. The beginning of 2024 saw us start **Cards, Camaraderie and Coffee** at Élémentaire Café, an initiative aimed at developing new friends and having fun. It also saw the commencement of **A Celebration of Life for the Living** at Geez RestoBar Café on Thursday evenings. Both were met with limited success.

There are three things ongoing which I wish to mention:

1. **Resto-Cafe** at Depot NDG on Somerled offers an incredible meal 4 days/week with a suggested donation of \$2/meal. The meals are prepared by their in-house chef and are fantastic! For all information, please see: the [Depot NDG website](#).
2. **Sunday Service** at St. Ignatius Church. I had not been to church for a very long time and had preconceived notions about what this would entail. These all went out the window upon my first 10 minutes at St. Ignatius! Upon walking in I was greeted by a handful of friendly ushers and upon entering the church was greeted with beautiful live music coming from a 4 piece ensemble at the front of the church. What really amazed me was the youth of the congregation! There must have been 300 people present, the majority of whom were young families - with what seemed to be at least 100 children! St. Ignatius is very much alive! Find out more about them from their [stig.ca](http://stig.ca) website.
3. **Honouring Jackie Wallace**. A group of us are moving to have Jackie Wallace - a community treasure for over 50 years, as coach, administrator, umpire and referee for the NDG Park Association, honoured by dedicating the field at the north end of Girouard Park (NDG Park) to him. Our plan is to erect a statue of Jackie in deep centre field - the northeast entrance to the park. Please support this by donating to our [GoFundMe](#).

In addition, we are continuing with **operation 2030** - the initiative aimed at transforming our community into the greatest neighbourhood in the world! We need your support and assistance to make all the necessary changes to our society, so please, get involved! You can find out more about this on the [NDG project website](#).

**BuyNothing NDG** is ongoing, with new members joining regularly. In order for it to work, we need people to offer up their wares. My goal is to make this much more than just free stuff. Please read about it here. [BuyNothing NDG](#).

# IMAGINE! Montreal

Quite possibly the most exciting thing to come down the pipeline is **IMAGINE!** Montreal and **IMAGINE!** Global Communities. While my vision is to transform NDG into the greatest community in the world by 2030, **IMAGINE!** envisions the development of 10,000 communities for 10,000 people each all across the world by 2030! This would seem impossible, however according to Ross Harvey (me), Creator and Founder of **IMAGINE!** Global Communities, with God all things are possible!

To understand a little about the concept, **IMAGINE!** Montreal will be operated as a Moneyless Economy (MLE). This means there will be no form of currency within the community. All community members will have a card (like a debit card), which will affirm that they have worked in the previous week and with this they will have access to everything inside and outside of the community.

All community members will have access to a 4,000 square foot beautifully adorned home, use of a late model Tesla car, as well as all the necessities to have a wonderful life - including access to great food and drink both at home and at an array of over 40 restaurants on site, access to sports fields, a brand new fitness and racquet sport facility, arena, golf course, equestrian facility and the like, as well as a variety of entertainment options including a multiplex cinema, performance hall with 5,000 capacity and amusement park.

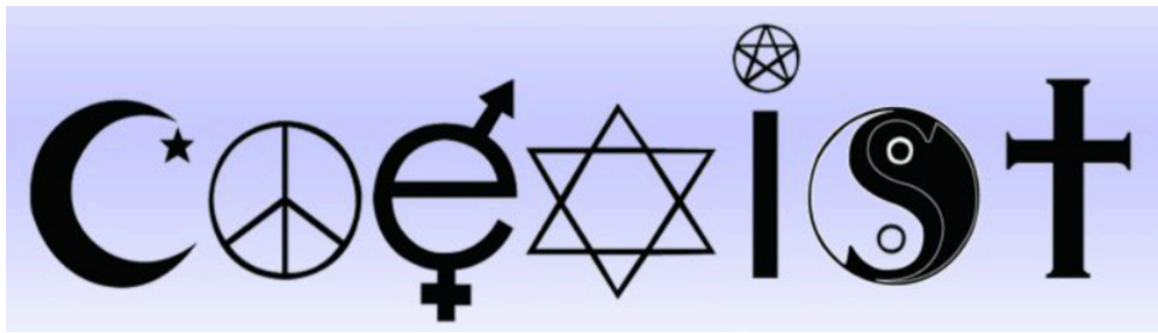

Technology and Artificial Intelligence (AI) will be of primary importance in our community - to the degree to which they will enable our community to elevate ourselves over the vast array of rote and menial jobs/occupations which most people are employed in, but don't enjoy. As a result, most people will be involved doing what they love - and our objective is to keep this to 20-25 hours/week in order to enable a great quality of life for all our community members.

From the standpoint of transportation, we will use the TaaS system from the outset, with an autonomous fleet of new Tesla cars and SUV's at virtually every corner, waiting to take you to your destination. This will eliminate the need for a bus system of any type as every person in our community will have access to this system

A very important component of our mission involves educating the world about what we are doing at **IMAGINE!** Montreal - in the interest of having people from all across the globe wanting to bring our system to their part of the world. To this end, we will have 2 world class Hotels - free of charge to all - for people who are coming from all areas of the world to learn about our system in the interest of duplicating it. For further information on this exciting initiative, please consult our website: [IMAGINE! Montreal](https://www.imagine-montreal.com).

Please watch this informational video about **IMAGINE! Montreal**.

**The Peace Project** started on the day of the Solar Eclipse, April 8, 2024. It was the result of a conversation I had whereby a friend told me that 2 million people were going to collectively pray for peace when the eclipse was full. My answer to this was; 'why does it take a solar eclipse to get people to do something about peace in the world? We need someone to come forward and lead a mission towards global peace.' What came next even surprised me! I asked the question; 'Why not me?' And this is how the Peace Project came into being!

There are countless thousands of initiatives aimed at delivering peace across the world in one form or another. My aim is not to be just another of these, but to act as a flashpoint for all of these - bringing us all under one roof - and moving forward as a powerful collective.

Something very interesting and exciting which has come out of my mission for global peace is an idea to make the headquarters for my Global Company - **G3** - 1 Place Ville Marie (PVM) - and to have my base and main residence be the John Lennon and Yoko Ono Suite at the Fairmont Queen Elizabeth Hotel. This is very fitting since John is my idol and the person I have modelled my life after for the last 20+ years.

Through the writings of Subhendu Das, I have come to understand and believe that the sole way we will ever accomplish global and continued peace in our world is if we transition to an economy where there is no currency in any form - a Moneyless Economy (MLE).

This is what I/we envision in **IMAGINE!** Montreal and **IMAGINE!** Global Communities. So to a greater or lesser extent, the **IMAGINE!** movement/initiative and The Peace Project are twin entities - which I am moving forward collectively with.

Both of these initiatives rely on mass action. As such, I ask you to read up on them - especially **IMAGiNE!** Montreal. This is doubtless the way of the future and will be responsible for bringing Heaven to Earth for all of mankind for eternity. As such, it is not an overstatement to say that this is quite possibly the most important endeavour ever conceived of/implemented in this world. Personally, I am working day and night, towards the inevitable end of having 10,000 people living in our Laurentian Community of 2,000 acres - **IMAGINE!** Montreal! Won't you join me?!

For further information on either of these initiatives, please check out our websites: [PeaceProject.ca](http://PeaceProject.ca) and [ANewDay.ca](http://ANewDay.ca).

## Find the greatness within

In 2001, myself and an associate, Michael Farber, started out on a mission to change the world through development of a new company - **NuVo** - focused on fitness, health and nutrition. Inside 11 months we had an office with 7 full time, dedicated individuals working towards the development of our company. We developed a plan to reach \$100M in global sales inside 3 years and this vision/mission attracted investors to us who wanted to take us onto NASDAQ. As President and CEO, I did not want to go that route and was voted out of the company I started - by my friends! The company burned through \$7M in seed capital and were out of business in less than 3 years.

It has taken me a long time to get back to where I am now, but my vision and plan for NuVo in its second life are much greater than even the first. It is not about money in any way. It is about getting a world which has lost the ability to dream and envision their ideal life (or never did in the first place) to 'redirect' the course of their lives and to head in a direction towards an incredible future.

I believe completely that within each of us - irrespective of who we are and what limitations we may believe we have - are the seeds of greatness - and that we all have limitless abilities to be anything we want to be - provided we channel all our focus and energy positively in the direction of our dreams.

NuVo is a huge company! It involves not only the development of a diffuse network of NuVoWay LifeStyle Coaches - the absolute best people to assist you in reaching your goals - but also the development of NuVoWay LifeStyle Centres featuring 8 courts each of racquetball, squash, tennis, badminton/short tennis, 8 table tennis tables, a state of the art fitness facility and sports bar/resto with 4 golf simulators and an outdoor area including a pool and terrace for 200.

In addition to this, NuVo will be the largest consumer goods company in the world, featuring only the best equipment in a large variety of areas. From the sports perspective, we will have one NuVo football - and it will be the one used by the NFL. We will have one baseball - that used by MLB. We will continue this for every sport and for every designation within each sport down to all equipment and accessories. We will have a sports shoe line unrivalled even by Nike or Adidas. We will also have a casual apparel line of unparalleled quality and depth/breadth - featuring clothing for men, women and children. Our casual shoe line will be even better and more complete than Skechers. As far as nutrition is concerned, we have engaged the services of Anthony Almada, the leading nutritional expert in the world, to design an unparalleled line of nutritional products for the masses focused on ensuring every person can function optimally. To see more about NuVo and what is in store for NDG and the world, please visit our website: [NuVoWay.ca](http://NuVoWay.ca)

## **The future of golf.**

Next to racquetball, golf is the greatest game God has given to mankind! **G3 Golf** was created in 2003 as the result of several endeavours I was involved in. In the summer of 2003 myself and two associates - Peter Kelly and Dave Stotland - started The Mulligan Tour - something I called the most INclusive golf club ever! We had 18 stops throughout the golf season, catering to on average 60 players at every stop.

At the close of the season, I scoured the internet to find suitable similar operations to mine across North America, with the interest being to band together and create something truly international. It was at this point that I came across Golf Intelligence (GI) and John Montague - out of Minneapolis. John, his right-hand man Kevin Unterreiner and I worked tirelessly in the months of late 2003 to develop something we called G3 - Global Golf Group.

On December 24, 2003, John called me to tell me that GI could not move forward with G3. I didn't quite understand his reasoning - but his desire was that I continue to work with them towards development of their system and the use of it to organize golf. We made a deal for me to be GI's Canadian Sales Director and in the early months of 2004, I landed GI a contract which was worth in excess of \$2M/year, providing Golf Handicap and Golf Life Management services for Golf Canada (the national governing body for golf) and their 400,000 members.

This was great, but it didn't address my desire and needs. My goal was to develop something very special for all golfers. Because I had landed the contract with Golf Canada, John told me that I couldn't have access to GI's Handicap and Golf Life Management System - which was and still is revolutionary - for my private usage. I tried valiantly to introduce G3 Golf into Montreal in 2004, but with no success.

In successive years I have set out to launch G3 Golf in Montreal, but it was never the right time/never had the necessary quality of people to bring about the desired outcome.

**In 2025, we will have G3 Golf in Montreal!** There will be G3 Golf Professionals across the landscape - down to every golf course and practice facility in the territory. My vision is to involve in excess of 100,000 golfers across the territory in G3 Golf activities. I will do my utmost to develop a G3 Golf Practice Facility in NDG and will work to transform Meadowbrook Golf Club in Cote St Luc into a 36 hole G3 Golf Championship Layout! In order to see everything involved in G3 Golf's repertoire, please visit our website: [G3Golf.ca](http://G3Golf.ca)

## **G3 Faith-Based Peer Mentoring**

My path these last 20+ years has been a difficult one. Despite my continued maintenance that I am fine, my family and friends have committed me to the psych ward no less than 5 times, for periods lasting between 2 and 6 months. This process has taken its toll on my life - with the very vast majority of my former 'friends' shunning me in the thought that I am in some way tainted. It is this stigmatization that has characterized my life over these last 20+ years - professionally and personally.

My official diagnosis was 'schizo-affective disorder' - a combination of bipolar disorder and schizophrenia. I was labeled.

In late 2023, a friend told me about a profession which really intrigued me. It was called Peer Support. I researched this quite extensively and was very interested in getting involved. I spoke with my doctor about it and she thought it would be great for me.

In the early months of 2024, I enrolled in the Recovery Transition Program's Peer Mentor Training Program - a 6 week intensive course to turn out volunteer peer mentors offered by the Allan Memorial Hospital. At first I loved the course. But with time I saw more and more problems with a variety of the ideas the program presented - not the least of which being that God seemed to be a VooDoo subject! From my perspective, God is the absolute centre of my universe and the universe. He is critical in bringing healing to everyone who is suffering.

Resultant from this and several other problems I had with the curriculum, I ceased my involvement in the program in the 5th week. I was saddened by this, knowing that I was letting down my doctor and nurse as well as family and friends who were excited for me. Inside a day, this all changed!

God led me to something bigger and better! When many people try to characterize me, they use the word 'brilliant.' What I believe is that I am an open channel from God. Over the course of the last 20+ years I have succeeded in taking thoughts and ideas He has given me and transformed them without any or much change into something of use in this world.

**G3 Faith-Based Peer Mentoring** is aimed at helping all people - everywhere in the world - to heal from whatever it is which ails them. Using ZOOM, Facebook and/or Google Video Chat, and under the tutelage of Joe Tavares, Peer Mentor extraordinaire, our mentors will assist every person to feel better and point their lives in a great direction. Important in this is that the 'mentees' do not have to know God or even believe. This is the role of the mentors. Through Joe, God will develop an unparalleled support system for people all across the world which will help legions to heal and will also bring them closer to God. For additional information, please see the following: [G3 Mentors](#).

# Heaven on Earth

**Heaven on Earth.** This is quite possibly my favourite subject! It is what I see this world headed for - in the immediate! As such, a great many of the initiatives I am developing have this as a recurrent theme.

Below is a brief summary of these different initiatives, links to find out more about them as well as any other information I deem important and/or pertinent about them.

Heaven on Earth website. I created this site completely using Artificial Intelligence (AI) to weave, narration, imagery and songs together. It was cited by Martin Rutte, founder of Project Heaven on Earth as brilliant! Please make the time to explore this in its entirety.

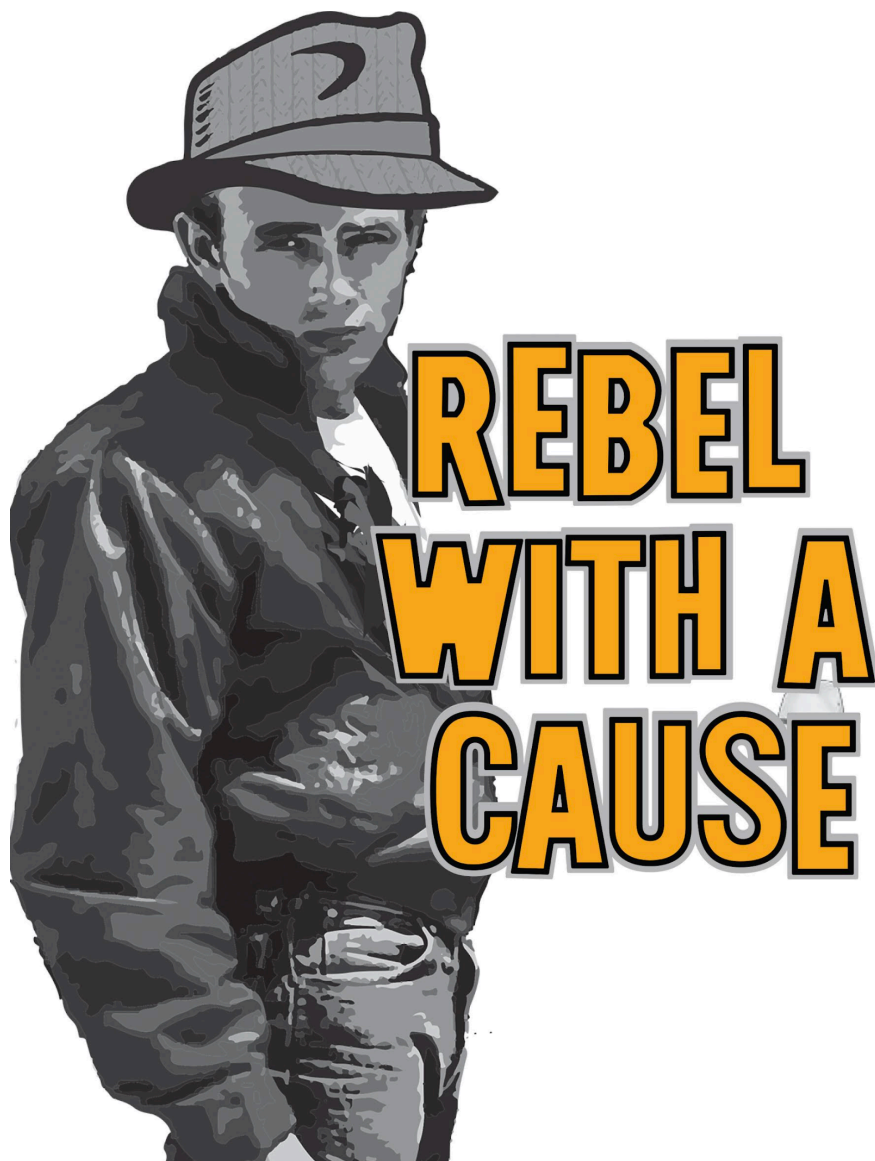

Andy Coolman Heaven on Earth Band. Andy is a virtuoso guitar player - and God has told me that he is the greatest musician in history! Andy envisions taking his band to every major venue in the world and playing to hundreds of thousands of people live and via streamed video broadcasts!

Journey to Eden: Co-Creating Heaven on Earth. This is a video game with a significant difference - everything is redemptive! The players will progressively overcome every negative in this world, transforming their world into Heaven on Earth. We envision this as having a tremendous and beneficial effect not only on children but also adults who get wrapped up in playing these games. Our planned date of release is July 1, 2025.

The Skeleton Family Explores Heaven on Earth. Andrii Kulian, the inventor of Skeleton Man will be involved in developing a complete series of beautiful images of the Skeleton Family, husband, wife, boy, girl, dog, cat and bird - as they travel the world and involve themselves in a vast array of fun activities. The format we are using for this is a musical eBook, looking to introduce young and old alike to the great music of our time along with Andrii's beautiful images and ChatGPT's appropriate words. There will also be in excess of 100 T-Shirt images available as we progress.

Come Away With Me. The ongoing story of the life of Ross Harvey. The first line summarizes my mission/destiny: 'How one man followed his heart and through the Grace of God is leading mankind to Heaven on Earth.' Between January 1 and 4, 2004, I was in a coma in the Surgical Intensive Care Unit (SICU) at the Montreal General Hospital. I died in that time and saw the tunnel spoken about by people who have crossed over and then come back. In that time, God played my entire life for me over and over again. He gave me the above title for my story.

RH Web Creation. While this does not directly have a reference to Heaven on Earth, it does involve my efforts and complete works towards the end of developing something very special for each and every person I work with. It becomes their unique and distinct 'slice of heaven!'
